

Turn health care data into bottom-line savings

Medical & RX Management Report

This easy-to-read report benchmarks your data by location, industry and plan type. Explore data comparisons such as:

- Total Health Plan Costs
- Wellness Claims
- Emergency Room and Office Visit Utilization and Cost
- Claims by Major Diagnostic Categories

Ad Hoc Analysis

This sophisticated analysis feature allows us to get to the source of problem areas quickly by using IBM Cognos. We offer customized reporting to discover areas of opportunity to help you reduce benefits plan costs. Find health and Rx plan answers such as:

- What diagnoses do my high cost claimants fall under, and what other comorbidities are they affected by?
- Where are the most cost-effective places to go for specific procedures? How much would we save by renegotiating with the providers that have high costs?

Alternative Plan Modeling

After identifying cost drivers, you may want to tweak your plan design. The modeling feature helps us try out plan design alternatives to see how changes would impact both your budget and your employees.

Disease Profiler

Using reliable data from Truven Health Analytics, we can help you:

- Predict future costs and budget
- Negotiate more accurate rates with stop-loss carriers
- Design and implement a disease management program

Dashboard flagged high cost areas.
